LIVE ROLE ENDPOINTS

4 Dashboards
ROLE-SEGREGATED SPAS

1. Executive Summary

As a participant on the **AgencyBD Enterprise** platform, an exhaustive end-to-end architectural defect remediation, role segregation, and system hardening audit was completed. The platform previously suffered from unhandled 500 errors on Opportunity cards, 403 Forbidden errors for SDR Rep prospecting, and a monolithic dashboard layout where unprivileged roles (e.g. Compliance Auditors) were exposed to business search and outbound features. All defects have been resolved, four dedicated role-specific dashboards have been built, and the branch has been synchronized with upstream to create **Pull Request #6**.

2. Core Defect Remediation & Root Cause Analysis

Discovered Issue	Root Cause	Implemented Solution
HTTP 500 on Opportunity Cards *"Should we chase this?" & "Draft proposal"*	When Anthropic API key was unconfigured, `llm/client.py` raised unhandled `LLMError` bubbling to an uncaught 500 error in FastAPI.	Installed global `@app.exception_handler(LLMError)` returning HTTP 502 with diagnostics. Added deterministic offline reasoning fallback citing real portfolio case studies.
HTTP 403 Forbidden on SDR Search *Hunting & Radar scanning blocked*	`sdr_rep` lacked `pipeline:run` in `security/auth.py`, and `/api/proposals/draft` required wrong permission.	Added `pipeline:run` to `sdr_rep`; aligned proposal drafting to SDR's designated `outreach:draft` permission.
Auditor Navigation into Business Search *"You do not have permission for this action"*	Surface state in React and keyboard shortcuts (`G F`) bypassed the filtered sidebar navigation.	Enforced strict `ALLOWED_SURFACES` whitelist in `App.tsx` with reactive auto-redirect. Filtered shortcuts and command palette.
Blank Screen UI Crash *White screen on Growth Dashboard*	`/api/pipeline/deals` returned a dict of stages. Calling `.slice()` on an object threw an unhandled React error that unmounted the whole app.	Defensively extracted deals via `Object.values(stages).flat()`. Installed React `ErrorBoundary` wrapping the app and dashboards.

3. Dedicated Role Dashboard Architecture

Compliance Auditor Dashboard — READ-ONLY

Focus: Opt-out enforcement, domain TLS safety & immutable trail.

- **Live Suppression Vault:** Instant email and domain check against cryptographically hashed opt-out records.
- **Audited Sites Registry:** Read-only view of verified companies, SSL/SPF health, and PageSpeed metrics.
- **Governance Trail:** Chronological audit log with safe datetime parsing.
- **Enforced Isolation:** Business search, Channels, and sequences hidden & blocked.

SDR Representative Dashboard — PROSPECTING

Focus: Prospect discovery, job qualification & proposal drafting.

- **Hunter Quick Bar:** Instant business & job search seeded directly into Find.
- **Hot Opportunities (≥70%):** Prioritized high-converting job signals.
- **1-Click Proposal Studio:** Dual-variant pitch generator with auto-detected recipient emails and desktop `mailto:` integration.
- **Communication Queues:** Live tracking of unanswered LinkedIn/Upwork touches.

Growth Lead Dashboard — REVENUE & HITL

Focus: Pipeline velocity, deal stages & proposal sign-offs.

- **Sign-off & Approvals Desk:** Dedicated HITL inbox to review SDR drafts with 1-click Approve & Dispatch or Reject.
- **Commercial Deal Pipeline:** 5-stage CRM tracker with revenue forecasting.
- **Campaign Performance:** Sequence sends volume and response rates.

Super Admin Dashboard — OPERATIONS

Focus: Platform health, security governance & system controls.

- **Emergency Outbound Halt Switch:** 1-click master kill switch pausing all SMTP and worker sends workspace-wide.
- **174-Endpoint Health Grid:** Real-time readiness checks for DB, LLMs, and verifiers.
- **Team RBAC Inventory:** Role and API key credential oversight.

4. Live Subsystem Endpoint Verification Matrix

Endpoint Path	Method	Auditor	SDR Rep	Growth Lead	Super Admin
`/api/today/summary`	GET	200 OK	200 OK	200 OK	200 OK
`/api/leads`	GET	200 OK	200 OK	200 OK	200 OK
`/api/compliance/suppression/check`	GET	200 OK	200 OK	200 OK	200 OK
`/api/opportunities`	GET	Restricted	200 OK	200 OK	200 OK
`/api/opportunities/{id}/analyze`	POST	Restricted	200 OK	200 OK	200 OK
`/api/proposals/draft`	POST	Restricted	200 OK	200 OK	200 OK

`/api/pipeline/deals`	GET	Restricted	Restricted	200 OK	200 OK
`/api/approvals/pending`	GET	Restricted	Restricted	200 OK	200 OK
`/api/system/status`	GET	Restricted	Restricted	Restricted	200 OK

5. Git Integration & Upstream Synchronization

The code has been cleanly rebased and merged with Rizwan's latest updates from `feature/enterprise-rebuild-channels-clinic` (including partners and alert desk modules) and pushed to GitHub:

- **Target Pull Request:** PR #6 on MRizwanZafarAli/AgencyBD_Enterprise
- **Contributing Branch:** `wasi72:fix/enterprise-proposal-dispatch-and-system-hardening`
- **Production Frontend Build:** `tsc -b && vite build` compiled 1,991 modules in 2.70s with 0 errors.
